PCT

NOTIFICATION OF ELECTION

(PCT Rule 61.2)

Assistant Commissioner for Patents United States Patent and Trademark Office Box PCT

Washington, D.C.20231 ÉTATS-UNIS D'AMÉRIQUE

Date of mailing (day/month/year) 17 December 1999 (17.12.99)	in its capacity as elected Office
International application No.	Applicant's or agent's file reference
PCT/F199/00329	LEVO-ORAL1
International filing date (day/month/year)	Priority date (day/month/year)
23 April 1999 (23.04.99)	23 April 1998 (23.04.98)
Applicant	
LARMA, likka et al	

1.	The designated Office is hereby notified of its election made:
	X in the demand filed with the International Preliminary Examining Authority on:
	19 November 1999 (19.11.99)
	in a notice effecting later election filed with the International Bureau on:
i	
2.	The election X was
	was not
	made before the expiration of 19 months from the priority date or, where Rule 32 applies, within the time limit under Rule 32.2(b).

The International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland

SECTION III:

Claims 1 to 10 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(i) PCT).

SECTION V:

Prior art

Reference is made to the following documents:

D1 (EP-A-0 383 449) relates to heterocyclic compounds - including levosimedan (p. 3, formula I) and salts thereof as well as new intermediates to compositions containing these compounds and to a process for the preparation of the same. The compounds are useful as cardiotonic agents, antihypertensive agents and vasodilators for the treatment of congestive heart failure (p. 3, II. 1 to 5). In a conventional way it is possible to make formulations which liberate the active ingredient slowly during a prolonged period of time (p. 6, II. 42 and 43).

D2 (WO 92 12135 A; cited in the application) relates to salts of the (-) enantiomer of levosimedan, to compositions and to the process for the preparation as well as to new intermediates of this process. The compound according to the invention is useful as cardiotonic agent, antihypertensive and vasodilator for the treatment of congestive heart failure (p. 1, Il. 3 to 10).

D3 (WO 93 21921 A; cited in the application) describes levosimedan and its optically active enantiomers having significant anti-ischemic properties (p. 1, II. 11 and 12).

Novelty

In view of the prior art as summarized above the subject-matter of claims 1 to 10 is novel und Article 33 (2) PCT.

EXAMINATION REPORT - SEPARATE SHEET

Inventive step

The subject-matter of claims 1 to 10 involves an inventive step in the sense of Article 33 (3) PCT.

D1 which seems to be the closest prior art differs from the present application in that it is silent to the claimed controlled release composition. D1 only mentions that in a conventional way it is possible to make formulations which liberate the active ingredient slowly during a prolonged period of time (p. 6, II. 42 and 43).

The problem to be solved can be described as how to provide further peroral compositions providing a therapeutical effect over an extended period of time in a controlled release formulation.

The problem was solved by the present application claiming an controlled release composition. Said composition provides an improved oral delivery system for levosimedan compared to conventional immediate release and long-acting preparations including the following advantages:

- reduction of undesired effects of high levosimedan levels such as increased heart rate by lower peak plasma levels
- reduced frequency of administration
- reduced accumulation of active metabolite (II) causing undesired effects

Therefore, present claims 1 to 10 seem to be inventive (Article 33 (3) PCT).

Industrial applicability

For the assessment of the present claims 1 to 10 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

INTERNATIONAL PRELIMINARY

Int mational application No. PCT/FI99/00329

EXAMINATION REPORT - SEPARATE SHEET

SECTION VI:

D4 (WO99/16443) does not constitute prior art within the meaning of Rule 64.1 (b) PCT. It does not appear to be relevant to the claims of the present application.
